

We create virtual learning environments (VLE), systems designed to support teaching and learning in an educational setting.

Some benefits of our work:

~Economize on the time of teaching staff, especially when they are also involved in research and administration. The extent of the economy over traditional "talk-and-chalk" teaching is not yet clear, but for instructors without web development expertise, using a VLE absorbs less time and produces a more professional result.

~Provide a service for consumers, advocates, and students who increasingly look to the internet as the natural medium for finding information and resources.

~Ensure that quality control requirements are met by providing a standard vehicle for collecting the required information.

~Facilitate the integration of distance and campus-based learning.
